

Liquid Aid

A healthy body is mild alkaline with a pH level of 7.35 to 7.45. MARCUS WONG discovers that an overly acidic system results in health problems and might even be the cause of your paunch.

In 2006, Mr Raymond Chu suffered a silent heart attack that required surgery to insert two medical stents as well as a ballooning valvuloplasty. The procedures saved his life, but left him physically weakened, so he took his pastor's recommendation to switch to AOX antioxidant alkaline water.

Raymond was pleasantly surprised to find that his health improved after just one month, with relief from the rheumatoid arthritis that had plagued him since his 30s - he could finally bend and flex his fingers as the swelling receded.

A question of balance

"Friends told me that I looked better, and I certainly felt more energetic," Raymond says. After just four months of being on AOX water, Raymond's blood tests showed that even his cholesterol levels had dropped back to normal, allowing him to cut back on his medication.

Mr Jeffrey Tan (Darkfield Microscopist, Living Stream) says that acidosis (a condition of increased acidity in our blood) is the cause of many degenerative diseases like arthritis and osteoporosis as the increased acidity leads to accumulation of acidic waste around the joints, causing joint irritation. Because our blood stream cannot remove this waste easily, alkaline water helps greatly as it neutralises and removes the waste from our body.

It's not just water

Curious to find out what my blood analysis would reveal, I too had a Live Blood Analysis done, and we detected (to my horror) the presence of heavy metals and acidic waste in my blood. My cells were clustered, slow moving, abnormal in shape and exhibited significant free radical damage.

I had one glass of AOX antioxidant alkaline water.

before

after

In 20 minutes a follow-up analysis showed some of my cells had sprung back to normal, and all were now completely separated and flowing swiftly.

Unlike regular filtered water, AOX water is rich in antioxidants, negative ions, natural minerals and oxygen, which are certainly good for our health. Still not convinced?

Check out www.aox.com.sg and let the scientific and medically-based reports do the talking. ✂

Win one AOX-2000 Water Dispenser (Worth \$1899) or One of 50 Free Live Blood Analysis sessions (worth \$120 each) Fill the coupon and mail to: Robinson Road Post Office, P.O. Box 189, Singapore 900339.
